

SORNNACHA BURANAPONGWATTANA

Full Stack Developer

Email: sornnacha.bu@gmail.com | Line: @maxcct

Portfolio: https://sornnacha-buranapongwattana-portfolio.khumtrip.com

SUMMARY

Full Stack Developer with a background in international tourism and a passion for building modern web applications. Skilled in several tech stacks including React, Next.js, Node.js, MongoDB, MySQL, and more, with hands-on experience in both frontend and backend development. Quick to learn, team-oriented, and always eager to take on new challenges.

EXPERIENCE

Full Stack Developer | Dynamic IT Solutions Co., Ltd. (DITS), SCGJWD Group Nov 2025 – Present
- Develop logistics software (WMS, OMS, yard management) for enterprise clients end to end, from PostgreSQL / SQL Server schemas and NestJS REST APIs to Nuxt 3 user interfaces.
- Deliver real-time features (Socket.io), PDF/Excel reporting, SSO authentication and warehouse-system integrations (CCMS, One Fulfillment).

Website Programmer (Full Stack Developer) | JOBBKK.com Co., Ltd. 2024 – Oct 2025
- Full stack development for the Japan All Pass e-commerce website (see Projects).

PROJECTS

Teenoi Logistics WMS | Teenoi restaurant group Aug 2026 – Present
- Built the transfer flow (TR → TO → pick → QC → goods issue → dispatch) and the auto-allocation center.
- Built truck-round planning and per-branch FEFO/LIFO picking on multi-tenant PostgreSQL with RLS.

Multi-client OMS (Order Management System) for several enterprise clients Apr 2026 – Present
- Built the Purchase Order module (Excel import, validation) with CCMS warehouse integration and Portal SSO login.
- Built auto-detection and matching of multi-platform shipping-label PDFs and bulk order-support tools.

Isuzu AYMS (Automatic Yard Management System) Nov 2025 – Apr 2026
- Built JWT/Argon2 auth, gate-in with location suggestion, VIN/QR inspection, yard overview and PDF delivery sheets.

Japan All Pass (JOBBKK) | E-commerce website 2024 – Oct 2025
- Built React/Next.js and Node.js/Express features, third-party API integrations and a Laravel/MySQL back office.

Banpong Molly – Side Project (Feb 2026 – Present) | https://banpongmolly.com
- Fish-contest platform: event registration, payment-slip approval, live checkout queue and fish ranking reports.
- Nuxt 4, NestJS, TypeORM, MySQL, Redis/BullMQ, Socket.io; Android (Java) Sunmi POS app for queue ticket printing.

SKILLS
